

**WTC POLYRECYCLING SARL**

Supporting the environment

October 2023

## Who we are

WTC Polyrecycling Sarl is a world class alternative to provide solutions that generate added value to all our customers.

### Background

- WTC Polyrecycling Sarl starts operations in **2008**, with the main goal of **distributing high-quality post-industrial materials**.
- WTC Polyrecycling Sarl provides solutions in handling **post-industrial plastic materials**, and consequently, becomes a **supplier of top quality recycled materials** for clients, both abroad and in the domestic market.
- Our main focus is to be a **circular economy company**, making the best use of post-industrial engineering plastics, granting greater benefit to both generating companies and customers.
- We work directly with companies that generate post-industrial plastic scrap, mainly from the **automotive, aeronautical** and **home-appliances** industries.
- WTC has the permits and programs in accordance with Schweiz operating regulations.

## What we do

We handle a wide range of plastics and engineering plastics.

### Materials

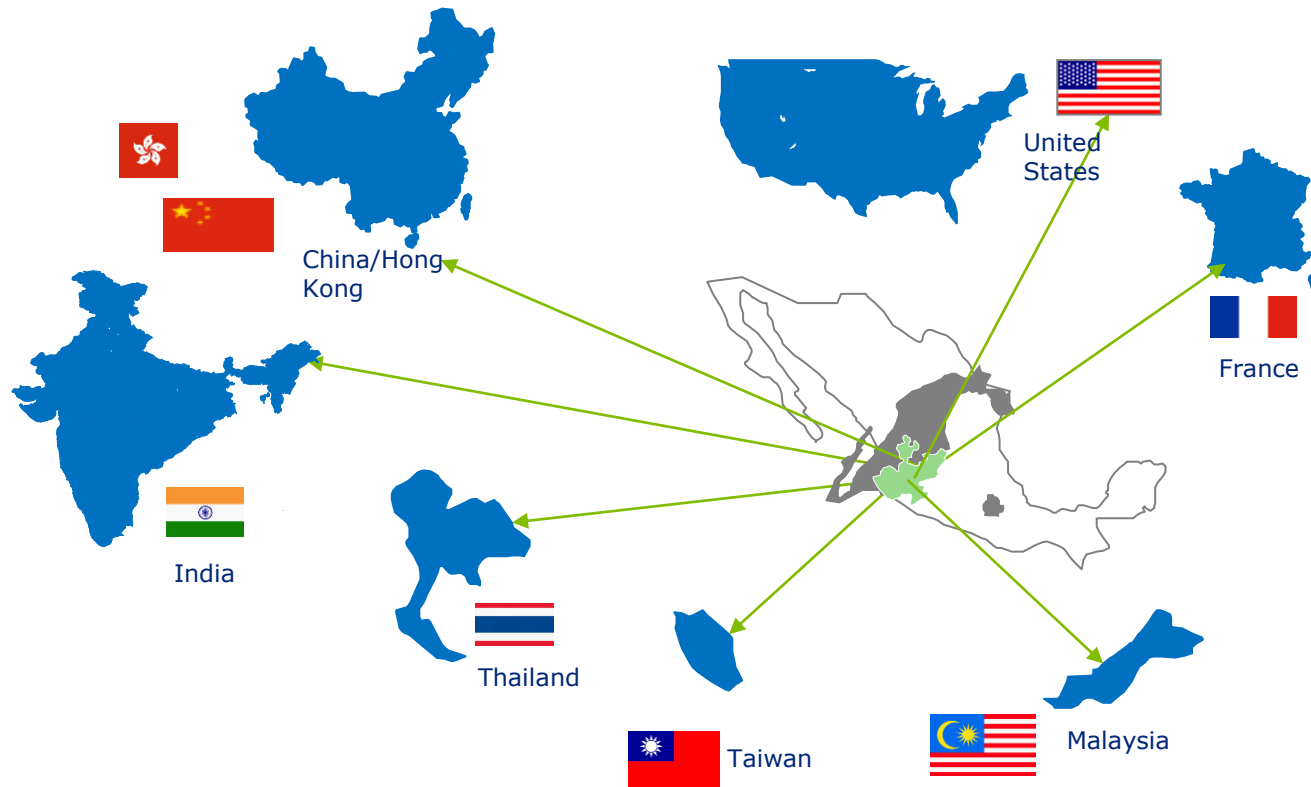

- WTC Polyrecycling Sarl offers the following plastic materials:
  - Acrylonitrile butadiene styrene (ABS)
  - Acrylonitrile styrene acrylate (ASA)
  - Ethylene Propylene Diene Terpolymer (EPDM)
  - High-density polyethylene (HDPE)
  - Waste Electrical Electronic Equipments (WEEEs)
  - Low-density polyethylene (LDPE)
  - Linea Low-density polyethylene (LLDPE)
  - Methyl methacrylate acrylonitrile butadiene styrene (MABS)
  - Polyamides with and with no glass fiber and/or mineral fillings (PA6 / PA66)
  - Polybutylene Terephthalate (PBT)
  - Polycarbonate (PC)
  - Polyethylene terephthalate (PET)
  - Polyoxymethylene (POM)
  - Polypropylene (PP)
  - Polystyrene (GPPS/HIPS)
  - Flexible Polyvinyl chloride (PVC flexible)
  - Rigid Polyvinyl chloride (PVC rigid)
  - Thermoplastic elastomer (TPE)
  - Thermoplastic olefin (TPO)
  - Thermoplastic polyurethane (TPU)
  - Thermoplastic Vulcanizate (TPV)

## How we do it

Our main export markets are the United States and Asia.

### Export markets

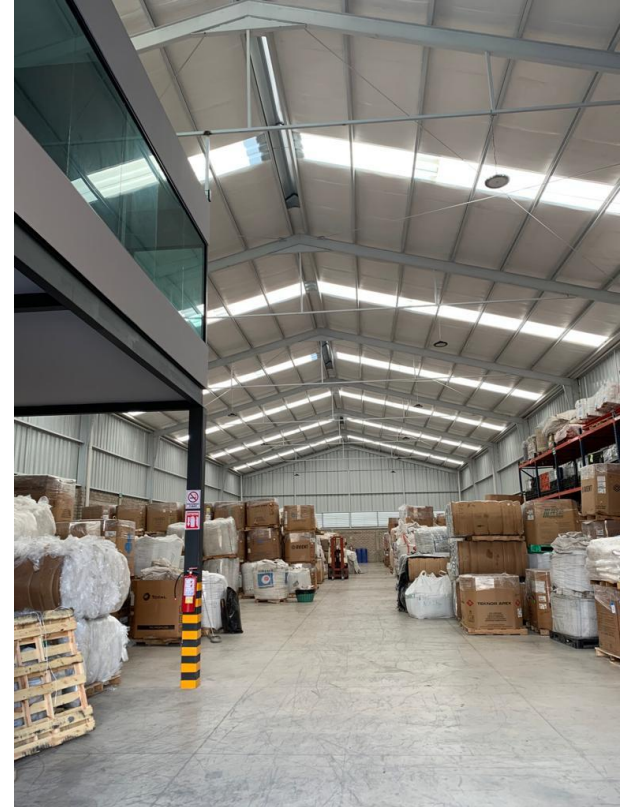

- Our materials are mainly shipped **abroad** to **Houston** (US), **Hong Kong** (HK), **Shanghai** (China), **Shekou** (China), **Mumbai** (India), **Kelang** (Malaysia), **Leam Chabang** (Thailand) and **Pays de Loire** (France), E U

### Competitive advantages

*One-stop shop:* Supply of different types of plastic materials with a single supplier.

Proven experience: 30 years in the market.

Permits: We have authorizations required by the Schweiz environmental authorities.

Machinery and equipment: We have the necessary equipment to achieve the desired quality in the materials we sell.

Global positioning: We have clients in different countries of the world, to whom we guarantee our materials' quality.

Logistics: We help our clients overseas get the best freight solution.

Laboratory (in progress): We are building our own laboratory to have each materials' specs and guarantee its quality.

**Best quality: Transform and commercialize post-industrial engineering plastics.**
